

ProZyme®

Ingredients

Lactose, dried *Aspergillus oryzae* (var.) fermentation product, dried *Aspergillus niger* (var.) fermentation product, and dried bromelain derived from *Ananas Comosus*.

Enzyme Activity

Alpha-Amylase (*Aspergillus oryzae* var.) 2000 SKBU/gm
Lipase (*Aspergillus niger* var.) 200 LU/gm
Cellulase (*Aspergillus niger* var.) 500 CCHU/gm
Protease (*Ananas Comosus*) 8 GDU/gm null

Guaranteed Analysis

Crude Protein..... 1% min
Crude Fat..... 0% min
Crude Fiber..... 0.5% max
Moisture..... 6% max

Feeding Guidelines

ProZyme comes in a palatable powder that is sprinkled on, or mixed in, your dog's food. All it takes is 1/4 teaspoon for every cup of food given. For best results, double the dosage for dogs 8 years or older.

Use ProZyme with every feeding throughout the life of your dog. ProZyme is as beneficial to the young dog requiring extra nutrition as it is to an older dog whose system no longer adequately absorbs nutrients. Excellent for those high-strung dogs or those which are prone to having a 'sensitive gut' and get diarrhea on a regular basis.

ProZyme is an all-natural, plant-derived enzyme food supplement. By adding ProZyme to your dog's diet, you restore missing digestive enzymes so that your dog can extract as many nutrients as possible from the food and supplements you're already giving him.

Tests have shown, including from the Mayo Clinic, that ProZyme can increase the absorption of essential nutrients and fatty acids from your dog's food by up to 71%—especially Zinc, Selenium, vitamin B6, Linoleic Acid, and Eicosapentaenoic Acid (EPZ-Omega 3). Without sufficient enzymes to break them down, large amounts of vitamins, minerals, carbohydrates, fats, and proteins can pass right through your dog's digestive system unable to get absorbed. ProZyme will not turn low quality food into something nutritious, but it will increase the absorption of nutrients that are already in the food. Better digestion and increased absorption provides natural relief from a number of difficulties, including dry and scaly coat, digestive disorders, immune disorders, coprophagia, skin problems, joint difficulties, excessive shedding, lethargy, flatulence, and more.

Packaging: 454 gram bottles treat 363 cups of food = approx. \$0.11 per serving.
