

K9 Super Fuel—by Animal Naturals

Ingredients

K9 Complete Primal Protein: Cooked chicken, Cooked beef, Cooked pork, Zero lactose non-denatured whey isolates, Intact non-denatured zero lactose micellar casein, Intact nondenatured freeze-dried bovine colostrum, *K9 Fat Fuel:* Stabilized rice bran, Prime beef fat, Canola oil, Stabilized flax, Extra virgin olive oil, MCTs (medium chain triglycerides; preferentially oxidized-burned as muscular energy over storage as fat), *K9 Recharge Fuel:* Zero sugar predigested glucose polymers, Resistant Starch (low glycemic, slow releasing complex carbohydrate), L-Glutamine peptides, L-Leucine, L-Valine, Resistant starch, L-Arginine, L-Taurine, Phosphatidylserine, L-Carnosine, Citrus bioflavonoids, Hesperidin, Grape skin extract, Beta Carotene, Ginkgo biloba, Lutein, Lycopene, Vanadyl, Chromium nicotinate, *K9 Strength Fuel:* Double creatine complex of exogenous, creatine monohydrate/ALA (alpha lipoic acid) and endogenous creatine matrix GAA/G (Glycocyamine/trimethylglycine), L-Arginine Alpha-Ketoglutarate, D-ribose, *K9 Endurance Fuel:* Anapylurotic & gluconeogenic fuels and other factors L-glycerol, L-Potassium lactate, L-Calcium lactate, L-Sodium citrate, L-Alanine, L-Calcium malate, L-Carnitine, Magnesium orotate, Potassium succinate, *K9 Joint Power:* D-glucosamine hydrochloride, MSM (Methyl-Sulfony-Methane), Chondroitin sulfate, Unhydrolyzed chicken collagen Type II, Willow extract, Borage oil, Licorice root extract, Acetyl-cysteine, Sodium hyaluronate (linear polysaccharide glucuronic acid and N-acetyl glucosamine matrix), *K9 Canine Wild Diet Mix:* FOS (fructo-oligosacchararides), Cruciferous vegetable mix powder, Freeze dried blueberry powder, whole leaf barley grass extract, Green tea extract, Cranberry fruit powder, Streptococcus faecium, Lactobacillus acidophilus casei, Lactobacillus acidophilus latis, Sccharomyces cerevisiae, Lipase, Amylolytic, Betagulanase, Hemicellulase, Protease, Galatosidase, *K9 Vite Fuel:* Vitamins and minerals microencapsulated to ensure higher vitamin bioavailability, reduce oxidation loss, negate offensive taste. Natural calcium from whey isolate, calcium citrate, Potassium chloride, Magnesium oxide, Sea Salt, Potassium iodide, Choline bitartrate, Vitamin E (alpha-tocopherol), Pyridoxine HCL, Inositol, Dicalcium phosphate, Copper gluconate, Zinc oxide, Folic acid, Dimethylprimidinol sulfate (source of vitamin K), Thiamin monohydrate, Calcium lactate, Paba, Sodium selenite, Over 80 trace minerals as naturally occurring in colloidal polysilicates.

Serving size

1 scoop, 26 grams

Guaranteed Analysis

Crude Protein (N x 6.25)..... 30%, 8g min
Crude Fat..... 28%, 7g min
Crude Fiber..... 7% max
Moisture..... 5% max

Calories per serving

128 kcal

Feeding

Feed 1/2 to 2 scoops per 25 lbs. of body weight depending on your dog's level of activity or amount of stress. You can feed recommended dosage mixed with your dog's regular meal, or you can mix the recommended dosage of Super Fuel in 1-2 cups water to make a delicious and powerful Super Fuel meal.

The company that makes K9 Super Fuel originally began producing human endurance sports drinks. They then turned their expertise to animals helping with endurance and nutrition. Only top human grade ingredients are used.

These top ingredients help to generate more muscle power for longer periods of time with less fatigue. K9 Super Fuel helps boost energy, repair tissue, reducing soreness and decreasing recovery time. This supplement is not just for athletic dogs, but is also great for those finicky dogs that have a hard time eating when traveling. K9 Super Fuel is designed to raise immune function in all dogs, which translates into improved health and stress resistance.

* Each dog is different, but experience has taught us that you may need to use only 1/2 of the suggested serving for many dogs.
