

# Young at Heart—by Animal Naturals

## Ingredients

**Life Force Proteins:** Cooked chicken, Partially pre-digested zero lactose total milk protein, L-Glutamine, L-Arginine, L-Taurine, **Life Force Lipids:** Chicken fat, beef fat, rice bran, high-oleic sunflower oil, virgin olive oil, MCTs (Medium chain Triglycerides), plant derived DHA, L-Carnitine, **Life Force Carbohydrates:** glucose polymers, resistant starch, **Life Force Antioxidants:** cruciferous vegetable mix powder, alfalfa powder, dried tomato powder, cabbage leaf powder, whole leaf barley grass extract, FOS (fructo-oligosaccharides), freeze dried blueberry powder, freeze dried strawberry powder, decaffeinated green tea extract, citrus bioflavonoids, cranberry fruit powder, freeze dried carrot powder, freeze dried broccoli powder, lutein, zeaxanthin, **Life Force Vigor Vitamins and Minerals:** natural calcium from whey isolate, Calcium citrate malate, Potassium chloride, Magnesium oxide, Potassium iodide, Choline bitartrate, Vitamin E, Pyridoxine HCL, Inositol, Di-calcium phosphate, Copper gluconate, Zinc Oxide, Folic acid, Dimethylprimidinol sulfate (source of vitamin K), Thiamin monohydrate, Calcium lactate, Paba, Over 80 trace minerals as naturally occurring in colloidal polysilicates, **Life Force Mental and Heart:** L Arginine, L-Citrulline, Acetyl-L-Carnitine, Co Q10, Ribose, **Life Force Muscle Protectors:** Creatine monohydrate, L-Carnosine, L-Leucine, L-Isoleucine, L-Valine, **LifeForce Joint Support:** D- glucosamine hydrochloride, MSM, Chondroitin sulfate, Hyaluronic acid, **LifeForce Digest-all:** Lactobacillus acidophilus casei, Lactobacillus acidophilus latis, Lipase Amylolytic, Betagalcanase, Hemicellulase, Protease, Galatosidase

## Serving Size

1 scoop (23g)

## Guaranteed Analysis

Crude Protein..... 28%  
Crude Fat..... 28%  
Crude Fiber..... 9%  
Moisture..... 6%  
Ash..... 5%  
Carbohydrates..... 24%

## Feeding Guidelines

Begin with 1 scoop per 25 lbs. of body weight. Double the dosage for especially debilitated or emaciated dogs.

Dog's Weight	Amount
Up to 24 lbs	1/2 scoop
25 to 49 lbs	1 scoop
50 to 74 lbs	2 scoops
75 lbs and over	3 scoops

Turn back the clock on your best friend! Young at Heart is the first canine supplement designed to return your dog's metabolism back to its prime. Youthful levels of hormones and other vital compounds decline with age, which is why joints, brain function, and cellular activity deteriorate, as dogs get older. This supplement helps combat muscle wasting, supports joints, restores healthy cellular fluid balance, supports mental function, and protects eye and heart health, and much, much more. Made with human-grade ingredients, Young at Heart employs specially processed nutrients that are better absorbed and can reduce stomach distress.

**Combat Muscle Wasting & Support Joints:** Young at Heart is designed to fight muscle loss associated with aging (sarcopenia). Muscle loss slows metabolism, reduces immunity and vigor. Reversing muscle loss boosts metabolism, strengthens joints and resistance.

**Restore Healthy Water Balance:** Young at Heart helps hydrate older canine bodies, optimizing cellular water balance. "Volumizing" cells creates favourable metabolism for optimal health.

**Enhance Digestion & Absorption:** Young at Heart employs advanced, partially pre-digested calories used in elite medical and sports foods. This can reduce stomach distress in older animals, while boosting uptake.

**Support Mental Function:** Phosphatidylserine and other nutrients are suggested to favourably influence age related cognitive decline (ARCD).

**Support Eye & Heart Health:** Antioxidants lutein, zeaxanthin and other related phyto-factors have been demonstrated to support macular (eye) health. Co Q10, ribose, and others may assist heart function in older animals.

\* Each dog is different, but experience has taught us that you *may only need* to use 1/2 of the suggested serving.

**Packaging:** 3.6 lbs. jug at 71 suggested servings @ approximately \$0.89 per serving.
